About me

UI/UX & Product Designer | Design Team Leader
With almost 5 years of experience in UI/UX and Product Design, I have successfully contributed to and **led 30+ projects across diverse industries**, including IoT, real estate, Web3, and education. Notably, my work in Web3 has resulted in products attracting **over 700,000 users** within just one week, showcasing my ability to design impactful and user-centered digital experiences.

- I/ Key Experience and Skills:
- **UI/UX Leadership:** Nearly 2 years of experience in a leadership role, guiding design teams with 3 members, defining design strategies, and collaborating closely with stakeholders to deliver innovative solutions.
 - **Diverse Skill Set:** Expertise in UI/UX Design, complemented by strong capabilities in graphic design, social media banners, and video production for marketing and branding initiatives.
 - **International Collaboration:** Proven track record of working with international clients and cross-functional teams from Singapore, South Korea, and the EU, adapting to diverse cultural perspectives and design standards.
- II/ Design Philosophy:
- I believe that exceptional design goes beyond aesthetics-it's about creating intuitive, efficient, and impactful experiences.
 - My approach is grounded in user research, data analysis, and iterative testing to craft solutions that are not only visually appealing but also drive tangible business outcomes.

Experience

Oct 2024 - Present Quantum3labs - Stormbit

Building upon previous experience at Orbit Technology, we continue to develop products in the crypto sector, focusing on finance, such as Stormbit - Insured Vaults; Qash - Payroll Solution; and Prism - a QR code payment app using digital assets. The design team consists of 3 members: UI/UX Design and Graphics Design. We are closely involved in the feature development process.

Aug 2023 - Jan 2025 Orbit Technology

My first experience in the highly creative and fast-paced field of Crypto. After 6 months working as a Design Team Lead with a team of 4, I took on the role. I launched the Kibble Clicker mini-game on the TON Network (a 2024 trend), attracting over 700,000 users within a week of its launch. The Kibble Exchange project raised over \$5 million in VC funding. In addition to my UI/UX/Product design experience, I also collaborated with the Marketing team to design banners for marketing campaigns.

Dec 2022 - Jul 2023 iLotusLand - Viet An Group

Moving to a new, more professional environment. As a corporation with the top market share in Vietnam in the field of IoT (Internet of Things) for environmental monitoring, helping businesses regulate and control factory emissions. Here, you will learn all skills related to the product mindset, directly collaborating with the Product Owner, Business Analyst, and Product team to develop products. In addition, you will work closely with teams such as QA, QC, DevOps, etc.

Nov 2021 - Dec 2022 8X land

UIUX Designer, a graduate of FPT University, is trying her hand at the real estate app field for the first time, allowing users to search and filter suitable properties.
